TO

HEWLETT PACKARD ENTERPRISE (HPE)

We are members of the Hewlett Packard Ltd Retirement Benefits Plan, or spouses of members, with service pre 1997

We draw to your attention the fact that although the RPI cost of living has risen by over 70% during the last 20 years of your governance, our pensions have only been increased by 5%.

We also note that over the same period those members with service post 1997 have received annual increases of up to 5% per annum.

As a result of your policy, we face a future of ever increasing poverty and deprivation, despite the company having a strong financial position.

We call on the company to live up to its proclaimed high ethical values, and to treat us with fairness and equality compared with members with service post 1997.

The Positive Outcome we want to see

We want to see the company and the pension Trustee working better together, in good faith, to develop a strategy and policy for sustainable future discretionary increases.

If IBM leadership and their pension Trustees can collaborate on discretionary increases - then why not HPE.
